COMPANY BACKGROUND

MB DEWATERING is 100% black owned company, registered in SA with the mission to provide Dewatering Services for the best outcome of all types of construction, health and safety.

This idea of joining in this sector is persuaded by need within the country due to the population growth and natural disasters within the country.

The sole owner of the company Mr Mohapi has been in the industry for more than ten years hands-on, pursuing his dream while doing thorough research about water management and keeping the environment safe and healthy.

MISSION

The mission behind the idea is to provide high quality services, working hand-in-hand with our clients to meet an excellent results according to the needs of our clients and ensure continuous improvement of required machinery and pumps, exceeding our client's expectations

VISION

Our vision is to bring the most trusted service among other competitors within the sector. We believe in the outcome of our work. We achieve this with our team of skilled and experienced professionals doing different tasks.

MATERIAL, TOOLS AND EQUIPMENTS

We use quality materials, tools and equipments from our trusted suppliers to ensure excellent results.

Sand, Slurry and Dredging Hydraulic Submersible Pump

The S6CSL pump is designed to use in applications requiring settled solids to be put into suspension and pumped with the discharge water. Primary applications include de-silting waterways.

SLUDGE DEWATERING BAG

Other jobs may include filling sand bags to prevent beach erosion, tank and digester cleaning or pumping sediment from caissons.

Double silicon carbide mechanical seals in a separate oil chamber.

Designed for toughest pumping of sand, sludge, slurry and other abrasives.

Mining, Aggregate, Sludge, Tailing Ponds, Silt Removal and Mill Scale.

OUR SERVICES

At MB Dewatering, we cover all aspects of the life cycle of a dewatering project, where moving water or solid-laden or viscous material laden liquids, from the construction site, quarrying or mining operation quickly and safely with MB Dewatering self-pumping pumps.

MB Dewatering specialises with

- ✓ Dewatering – Solid-liquid separation
- ✓ Dam cleaning – Environmental dam clean up
- ✓ De-sludging – Removal of dry sludge/semi sediment off site
- ✓ Industrial cleaning – Sump clean cut, canal silt removal, lined dam silt removal.

Environmental Health and Safety

MB DEWATERING always manage the risk by ensuring that the duties are conducted and compliant in accordance with applicable rules and procedures, including applicable legal and regulatory requirements.
